

## **Spring School 2025 – Interdisciplinary Scientific Networking**

**Date: 25.03.2025**

**Time: 9 am – 5 pm**

**Place: GFS GastFreundSchafft, Osterstraße 42, 30159 Hannover**

The One Health approach acknowledges the close linkage and the interdependency of the health of humans, animals, plants, and ecosystems. Consequently, One Health research requires interdisciplinary approaches. But what defines “interdisciplinarity”? What are the advantages and challenges of interdisciplinary research? How can true interdisciplinarity be achieved in One Health research, how can interdisciplinary projects be realised and what funding possibilities exist? These questions will be addressed in the workshop. The workshop is designed for young scientists\* who are members of the One Health Platform. There is no participation fee. Registration deadline is February 28<sup>th</sup>, 2025. If you have any questions please contact Dr. Dana Thal ([dana.thal@fli.de](mailto:dana.thal@fli.de)).

### **Program:**

09:00	Welcome Note
09:10	Introduction round
09:30	What is inter- and transdisciplinary research?
09:45	Group work: Benefits and downsides
10:20	Coffee Break
10:50	Presentation group work

11:10	How to set-up an interdisciplinary project
12:00	Lunch Break
13:00	Looking further: One Health research disciplines
14:30	Discussion round: how to make One Health research more diverse?
15:00	Coffee Break
15:30	Competition in research and teaching – is cooperation in research realistic?
16:00	Funding Opportunities for Interdisciplinary research
16:20	Wrap-up, closing remarks
